WINDBREAK FARMS

Artistry in Every Grain

After a fulfilling 31-year career as an educator, Bob transitioned to the fine art of cabinet making at Fanshawe College in London. Drawing on a rich family heritage in woodworking, Bob, alongside Cathy, now brings customers' visions to life through Windbreak Farm Wood Works. From custom breadboards to charcuterie boards, each piece is crafted in their own workshop with meticulous attention to detail.

At Windbreak Farm, environmental stewardship is a core value. They prioritize local sourcing for raw materials and use salvaged lumber whenever possible. Sustainability also guides their firewood operations, ensuring responsible harvesting practices.

Prior to 2019, Windbreak Farm also operated a charming Bed and Breakfast. Though the B&B has since closed, Bob and Cathy fondly reflect on that chapter with appreciation for the satisfying achievements and the many wonderful relationships they built.

Windbreak Farm Wood Works is passionate about the unique qualities of wood. Each type—whether it's the refreshing aroma of pine, the malty scent of maple, or the deep color of cherry—adds its own character and warmth. Understanding a tree's history, including exposure to elements and proximity to other trees, influences the wood's final appearance and durability.

Every piece crafted at Windbreak Farm reflects a commitment to quality and a respect for the natural beauty of wood. Bob and Cathy's work, rooted in their appreciation for the material, transforms nature's gift into lasting treasures.
