JC CATTLE CO

## Sustainable Farming, Exceptional Flavour

JC Cattle Co is more than a cattle operation, it's a homegrown story of purpose, passion, and exceptional Canadian beef. Founded by three ambitious young farmers, Christine, Jonathan, and Morgan, JC Cattle Co began with a shared dream and two first-calf heifers.

Christine's roots run deep in agriculture, and when her family's dairy herd was sold, she knew she couldn't leave farm life behind. Today, that same family farm is home to JC Cattle Co. Jonathan, a Kemptville College agriculture graduate, came to Perth County seeking opportunity and found it in cattle. Morgan, raised in Milverton, brings organization, planning, and a passion for local agriculture, keeping the business running smoothly.

Together, the trio raises Canadian Speckle Park cattle, a breed originating from the Saskatchewan prairies. Known for their fine marbling, tenderness, and rich, buttery flavour, Speckle Park beef offers an unrivaled culinary experience. Their natural ability to thrive on grass-based diets makes them an eco-friendly choice for sustainable farming, and their adaptability ensures consistent quality year-round.

From herd selection to feed and care, JC Cattle Co prioritizes excellence at every step. Their commitment to sustainable practices and rigorous quality standards means every cut of beef is ethically raised, environmentally responsible, and undeniably delicious. The result is premium beef that delights the palate and builds trust between farmer and customer.

Together, they are dedicated to raising quality beef with care, integrity, and a deep respect for the farming traditions that shaped them. For them, farming is more than a job. It is a lifelong calling rooted in pride and commitment to their community.
