## Connecting Communities

Since its founding in 1924 as the Blanshard Municipal Telephone System, Quadro Communications has been a cornerstone of local connectivity. Over the past century, it has evolved into a leading provider of telecommunications services, offering high-speed internet, digital TV, mobile devices and plans, and home phone solutions.

In 2024, Quadro proudly celebrated its 100th anniversary, marking a century of commitment to enhancing communication in the communities it serves. From its early roots in Kirkton, Sebringville, Granton, and Uniondale, Quadro has expanded its reach to neighbouring areas like Thamesford, Perth County, Zorra and St. Marys, continually evolving to meet the changing needs of its customers.

Quadro's strong community focus is reflected in its active support of local initiatives. With a mission to enrich customer experiences through personalized service and innovative products, the company is known for its integrity, transparency, and value.

As an independent telecommunications company, Quadro is more than just a service provider—it's a trusted partner in the community. Every connection they make goes beyond their network; it demonstrates a dedication to the growth and well-being of the communities they support.
