# BIO AGRI MIX

## Mixing Innovation with Community

For over four decades, Bio Agri Mix has been a cornerstone in the Canadian agricultural landscape, rooted deeply in the heart of Mitchell, Ontario. Founded in 1983, this proudly Canadian-owned company has grown from a small local operation to become Canada's largest manufacturer and distributor of medicated feed additives and water-soluble medications for livestock. With every step of its journey, Bio Agri Mix has remained committed to one core value: improving animal health while supporting the local community.

What sets Bio Agri Mix apart is their unwavering dedication to innovation and quality. Their signature granulation technique, a testament to their expertise, ensures that feed mills and producers can dose livestock with unparalleled accuracy. This precision not only aligns with Canada's rigorous Hazard Analysis Critical Control Point (HACCP) standards but also helps producers minimize drug residues in feed—ensuring safer and healthier livestock across the nation.

Bio Agri Mix isn't just a business; it's a community. The company's head office and central manufacturing facilities in Mitchell are staffed by more than 90 employees, most of whom live within walking distance. This close-knit team is the backbone of the company and they are proud to be supporting the local workforce.

Their efforts have driven the company through three major expansions, with a fourth on the horizon—proof of the company's ongoing growth and its commitment to Perth County.
